EUROPEAN COMMISSION

HORIZON 2020 PROGRAMME – TOPIC: Hybridisation of battery systems for stationary energy storage

Interoperable, modular and Smart hybrid energy STORage systeM for stationarY applications

GRANT AGREEMENT No. 963527

Deliverable Report

D7.5 – Final Quality Assurance and Risk Management Plan

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 963527

Deliverable No.	iSTORMY D7.5	
Related WP	WP7	
Deliverable Title	Final Quality Assurance and Risk Management Plan	
Deliverable Date	30-11-2024	
Deliverable Type	Report	
Dissemination level	Confidential – consortium members only (CO)	
Written By	Thomas Geury (VUB)	12-11-2024
Checked by	All partners	22-11-2024
Approved by	Project Coordinator	28-11-2024
Status	Final	29-11-2024

Neither the European Union institutions and bodies nor any person acting on their behalf, may be held responsible for the use which may be made of the information contained therein.

Publishable summary

At the beginning of the project quality management and risk management procedures were set and agreed, as reported in D7.2. These procedures were followed throughout the implementation phase by all involved partners, ensuring that the project objectives are reached in time, good quality and within budget.

The risk management process set up in D7.2 helped to identify risks and to establish contingency plans throughout the project in a timely manner. The risk monitoring was carried out by the Executive Board, led by VUB. A risk table was created and frequently updated. The final version is reported in this document, as well as on SYGMA/the EC participant portal via the continuous reporting module.

Further, the report contains a short overview on how the pre-defined quality management procedures were implemented during the project.

Acknowledgement

The author(s) would like to thank the partners in the project for their valuable comments on previous drafts and for performing the review.
